

## INDEX TO VOLUME 46

### ARTICLES

- Accent on Thinking in Science for Children in the 60's in the Classroom Through Reading and Research, Illa Podendorf, 184-185.
- Accent on Thinking Through Reading at the Intermediate and Upper Grade Levels, Ruth H. Mattila, 174-176.
- Achievement in General Biology of Ninth Grade Pupils Compared with Tenth, Eleventh, and Twelfth Graders, Sam S. Blanc, 496-498.
- Addresses for Free Materials for Science Teachers, Athena G. Parker, 139-141.
- Application of the Discriminant Function to Problems in Science Education, Kenneth E. Anderson, 282-285.
- Behavioral Rigidity in Relation to Student Success in College Physical Science, James T. Shockley, 67-70.
- Challenging the Mind with New Science Materials, Olive Mayer, 176-179.
- Chemistry in Some 19th Century New England Normal Schools, Louis I. Kuslan, 210-215.
- Children's Understanding of Certain Concepts of Astronomy in the First Grade, Laura M. Yuckenberg, 148-150.
- Classroom Vulcanism, Arthur A. Delaney, 160-161.
- College Look at Modern Chemistry by Television, A, Frank X. Suttman, 202-206.
- Comparative Study of an Introductory Geography Course on ETV and in the Classroom, A, Huntley Dupre, E. Louise Curtis, Hildegard Binder Johnson, Robert A. Bauman and Palmer O. Johnson, 27-37.
- Competences of Secondary School Science Teachers, The, Leroy Spore, 319-334.
- Comprehension and Alleged Readability of High School Physics Textbooks, J. Stanley Marshall, 335-346.
- Council for Elementary Science International, 166-168.
- Crisis in Education: Science and Human Values, Victoria Wagner, 99-105.
- Don't Forget Children Are People, Helen Dolman MacCracken, 94-98.
- Earl Rouse Glenn, Clarence M. Pruitt, 293-297.
- Educational Dimensions for the Coming Epoch, 396-399.
- Educational Origin of the Research Chemist, A. Hirsch, 492-495.
- Evaluation of Certain Objectives of High School Physics with Reference to the Training of Future College Physics Majors and the General Education of All Students, An, Donald E. Lee, 385-389.
- Every Teacher a Researcher, Thomas E. Moriarity, 164-166.
- Experiment in Teaching Basic Science in the Elementary School, An, Lloyd Scott, 105-108.
- Experiment in Validating Objectives for the Curriculum in Elementary School Science, An, John D. McNeil and Evan R. Keislar, 152-156.
- Experimental Evaluation of a Student-Centered Method and a Teacher-Center Method of Biological Science Instruction for General Education of College Students, Kenneth V. Olson, 367-373.
- Experimental Evaluation of Field Trips for Achieving Informational Gains in a Unit on Earth Science in Four Ninth Grade Classes, An, Grace Benz, 43-49.
- Experimental Studies of Mathematical Concept Formation in Young Children, Patrick Suppes and Rose Ginsberg, 230-240.
- Experimental Study to Determine the Effect of a Selected Procedure for Teaching the Scientific Attitudes to Seventh and Eighth Grade Boys Through the Use of Current Events in Science, An, Paul Kahn, 115-127.
- Film Slide Test to Measure Ability to Apply Scientific Method in the Area of Mechanics in High School Physics, A, Harvey J. Goehring, Jr., 347-357.
- Generalized Mental Rigidity as an Explanatory Concept, Marvin D. Solomon, 62-66.
- Hanor A. Webb, Clarence M. Pruitt, 89-93.
- Helen Harvey Schwalen, Clarence M. Pruitt, 317-318.
- Implications for Science Education of a Teacher Competence Research, 473-486.
- Implications of Automation for the Teaching of Science, Daniel J. Leahy, 304-309.
- In Favor of Discrimination, Mervin E. Oakes, 198-201.
- Inquiry into Scientific Research, An, Frank Kodman, Jr. and Arthur B. Fein, 82-86.
- Isolating the Factors that Contribute to the Effectiveness of High School Science Programs, Robert W. Hanson, 425-435.
- Learning of Chemical Equations: Meaningful versus Mechanical Methods, The, Doris F. Falk, 37-42.
- Life History Background of Students Who Achieve in Science, The, Victor B. Cline, James M. Richards, Jr. and Walter Needham, 258-261.
- Low-Cost Laboratory for General Education Physical Science, A, Morris Goran, 253-254.
- Manner in Which Two Samples of Ninth-Grade General Science Students Analyze a Number of Selected Problems, The, Edith G. Chess, 127-133.
- Measured Differences in Identification Between Science and Non-Science Majors, Thomas M. Weiss, 58-61.
- Mervin Elijah Oakes, Clarence M. Pruitt, 193-197.
- Mewaldt-Jensen Hall, Clarence M. Pruitt, 473.
- Motivation for Science Careers, John T. Dailey, 255-257.
- Mrs. Charles Edgar Montgomery, Clarence M. Pruitt, 229.
- Natural Science Experiences Significant to Elementary School Programs of Outdoor Education, Kenneth V. Pike, 141-145.

- Nature of Physical Science Education for Pre-Theological Students at Lutheran Colleges, The, Erich Hopka, 373-378.
- New Journal of Education, A, Hanor A. Webb, 114.
- New Techniques in Science Instruction in the Elementary Schools, Albert F. Eiss, 172.
- Ninth vs. Tenth Grade Placement of General Biology, Robert E. Yager and Normal F. Dessel, 436-439.
- Orbiting a Science Program, Brenda Lansdown, 180-184.
- Pitfalls in the Evaluation of New Curricula, Robert W. Heath, 216.
- Points of View on Programmed Instruction, M. Daniel Smith, 302-303.
- Possession of Science Abilities and Its Relationship to Student Teacher Training in a Liberal Arts College, The, Belle D. Sharefkin, 452-460.
- Preliminary Report on the Evaluation of Continental Classroom, A, John J. Kelley, 468-473.
- Preparation and Evaluation of Unit Text Materials in Science for Low Ability Junior High School Students, The, Arnold J. Moore, 488-492.
- Principle-Unit-Project Method of Teaching Science, The, Luther M. Colyer, 460-468.
- Problems of Classroom Adjustment of Indian Children in Public Elementary Schools in the Southwest, Miles V. Zintz, 261-269.
- Program of the Association for the Education of Teachers in Science, 297-298, 301.
- Proposed Model for a Summer Course in Zoology for Gifted High School Students, A, Marvin Druger, 447-451.
- Ralph Knupp Watkins, Clarence M. Pruitt, 1-5.
- Relation of Intelligence and Sex to the Use of the 'Is of Identity' for High School Students, The, Joseph T. Vellanti, 71-82.
- Research in Science Teaching at the Elementary Grade Levels, 133-138.
- Retention Value of Filmed Science Courses, J. M. Sadnavitch, W. J. Popham, and W. A. Black, 22-27.
- Role of State Academies of Science in Science Education, The, Albert B. Carr, 299-301.
- Role of the Administrator in Elementary School Science, The, Albert F. Eiss, 170-171.
- Sciences, Pure and Applied, in the First Century of the Land-Grant Institutions, The, Richard Bradfield, 240-247.
- Science Supervisors in Elementary Schools, Paul F. Ploutz, 169-170.
- Scientific Foundations of Education, Russell Meyers, 50-58.
- Self-Estimates of Ability to Teach Science, Patrick J. Groff, 162-163.
- Sixth Graders Dissect a Chicken, W. Ray Rucker, 156-159.
- Some Factors Which Influence a Selected Group of College Freshmen Choose Scientific Hypotheses, Zylpha D. Hurlbut, 358-367.
- Some Implications of Reactions of State Superintendents and State Chairmen of North Central Association Committees to a Questionnaire Pertaining to Certain Recommendations for Master's Degree Preparation for Master Teachers of Biological Sciences in High School, H. William Crall and B. Maurice Meyers, 401-405.
- Some Necessary Working Assumptions of the Scientist, Joseph R. Cautela, 285-292.
- Some Notes on the Imperatives of Curriculum Research and Development, William H. Bristow, 217-221.
- Some Results of Twelve Yearly Studies of Tele-viewing, Paul Witty, 222-229.
- Spring Testing Program of the Examinations Committee—ACS, 114.
- Stars Overhead, The, Stan Loewy, 145-148.
- Study of Contrasting Methods in College General Biology Laboratory Instruction, A, Douglas M. Dearden, 399-401.
- Study of Personality, Value and Interest Patterns of Student Teachers in the Areas of Elementary, Secondary, and Special Education, A, Marion John Philippus and Louis Fleigler, 247-252.
- Study of Several Factors and Their Relationship to Achievement in High School Chemistry by Use of Factorial Design and Covariance, A, Guy B. Homman and Kenneth E. Anderson, 269-282.
- Study of the Attitudes of Fifth-Grade Teachers of Cumberland County New Jersey Toward Science and Their Preparation for Teaching in the Elementary School, A, Patricia Lorraine Wytiaz, 151-152.
- Study of the Dimensionality of the Selection Criteria Used in the Thayer Academy Summer Science Program, A, Kenneth J. Jones, 440-442.
- Survey of the Range of Subjects Taught by the New Jersey Secondary School Science Teachers, A, Rufus D. Reed, Irwin H. Gawley, and Frank X. Suttman, 206-210.
- Target: Objectives, Samie K. Jacobs, 86-88.
- Team Teaching in the Elementary School: Implications for Research in Science Instruction, Abraham S. Fischler and Peter B. Shoresman, 406-415.
- Toward Quality Teaching in Science, Albert B. Carr, 173-174.
- Traveling Science Teacher Lecture—Demonstration Program, The, Joseph E. Bowles, Jerrold William Maben, and F. B. Dutton, 390-392.
- Two-Year Study of Teaching Human Biology Via Television, A, B. John Syrocki, and Russell S. Wallin, 379-384.
- University of California Elementary School Science Project: A Two-Year Report, The, Lloyd Scott, 109-113.
- Use of the White Films in the Teaching of Physics, The, Milton O. Pella, Julian Stanley, C. A. Wedemeyer, and W. A. Wittich, 6-21.
- Using a History of Science Case in the Junior High School, Elba O. Carrier, 416-425.
- Using the Scientific Approach in Constructing a Course in Biology for the Senior High Schools in Egypt, Sami I. Boulos, 442-447.
- What Accreditation Can and Cannot Do in Securing Better Science Teachers, Albert E. Meder, Jr., 310-316.
- Why Are Our Elementary School Teachers Reluctant to Teach Science, Edward Victor, 185-192.
- Wilbur Lee Beauchamp, Clarence M. Pruitt, 393-395.
